 prenatal test **by Genesys Diagnostics Inc.**

Fetal Cell Free DNA Requisition Form

1: PATIENT INFORMATION

PATIENT NAME (LAST) (FIRST) (M.I.)		Sex : Female	BIRTH DATE(Month/Day/Year)	
Social Security #		Electronic Medical Record #	Ordering Physician Name	
PATIENT ADDRESS (STREET) CITY STATE ZIP		PATIENT PHONE #		
<input type="checkbox"/> MEDICARE PRIMARY		<input type="checkbox"/> MEDICARE SECONDARY		
MEDICAL ASSISTANCE NUMBER		STATE		
POLICY HOLDER Name		POLICY HOLDER DATE OF BIRTH	MEMBER/POLICY #	GROUP #
RELATIONSHIP OF PATIENT TO INSURED <input type="checkbox"/> SELF <input type="checkbox"/> SPOUSE <input type="checkbox"/> DEPENDENT		INSURANCE CO. NAME		

PLEASE PROVIDE A COPY OF INSURANCE CARD(S) FOR BILLING PURPOSES

2: Non Invasive Cell Free DNA Screening Test for Fetal Health from Mother's Blood: To Screen for the Following:

<p>Test Menu Options Choose either Singleton or Twin: <input type="checkbox"/> Singleton Pregnancy - chromosome 21,18,13 <input type="checkbox"/> Sex Chromosome aneuploidies options: Klinefelter Syndrome (XXY) XYY Syndrome (XXY) Monosomy X (Turner Syndrome) Trisomy X syndrome (XXX) <input type="checkbox"/> Trisomies 9 and 16 option <input type="checkbox"/> Microdeletion Panel: 22q11- (DiGeorge), 15q11- (Angelman/Prader-Willi), 1p36-, 4p- (Wolf-Hirschhorn), 5p- (Cri-Du-Chat) <input type="checkbox"/> Twin Pregnancy - chromosome 21,18,13 <input type="checkbox"/> Presence of Y chromosome option</p>	<p>Test Indications Chose at least one : <input type="checkbox"/> Advanced maternal age (AMA), 1st pregnancy (O09.519, O09.511, O09.512, O09.513) <input type="checkbox"/> Advanced maternal age (AMA), not 1st Pregnancy (O09.529, O09.521, O09.522, O09.523) <input type="checkbox"/> Abnormal ultrasound, non-CNS (O28.3) <input type="checkbox"/> Abnormal ultrasound, CNS (O35.0XX0) <input type="checkbox"/> Abnormal maternal screen (O28.3) <input type="checkbox"/> Chromosomal abnormality suspected in fetus (O35.1XX0) <input type="checkbox"/> Previous pregnancy/child affected with chromosome abnormality (O35.2XX0) <input type="checkbox"/> Family history (Z84.89) <input type="checkbox"/> Supervision, other high-risk pregnancy (O09.899, O09.891, O09.892, O09.893) <input type="checkbox"/> Supervision, normal 1st pregnancy (Z34.00, Z34.01, Z34.02, Z34.03) <input type="checkbox"/> Supervision, other normal pregnancy (Z34.80, Z34.81, Z34.82, Z34.83) <input type="checkbox"/> Low Risk/ Maternal Anxiety <input type="checkbox"/> Other</p>	<p>Clinical Information Gestational Age: weeks/ days on MM/DD/Year Dating Method: <input type="checkbox"/> LMP <input type="checkbox"/> CRL <input type="checkbox"/> Date of Implantation <input type="checkbox"/> Other <hr/> Date of Draw: (MM/DD/Year) Maternal Height <input type="checkbox"/> cm <input type="checkbox"/> ft in Maternal Weight kgs <input type="checkbox"/> lbs <hr/> Client Sample ID:</p>
--	--	---

Comments: The verifi prenatal is validated for singleton and twin pregnancies with gestational age of at least 10 weeks 0 days, as estimated by last menstrual period, crown rump length, or other appropriate method (equivalent to 8 weeks fetal age as determined by date of conception).

3: HEALTHCARE PROVIDER AUTHORIZATION

I certify that (i) this test is medically necessary, (ii) the patient (or authorized representative on the patient's behalf) has given informed consent (which includes written informed consent or written authorization when required by law) to have this testing performed, and (iii) the informed consent obtained from the patient meets the requirements of applicable law and Genesys's Patient Informed Consent. I agree to provide Genesys, or its designee, any and all additional information reasonably required for this testing to be performed.
 Signature of Healthcare Provider (Required) _____ Date (Required) _____

4: PATIENT CONSENT (Required for New York and Massachusetts Patients)*

By signing this form, I, the patient having the testing performed, acknowledged that: (i) I have been offered the opportunity to ask questions and discuss with my healthcare provider the benefits, risks, and limitations of the test to be performed; (ii) I have discussed with the healthcare provider ordering this test the reliability of positive or negative test results and the level of certainty that a positive test result for a given disease or condition serves as a predictor of that disease or condition; (iii) I have been informed identifying an appropriate healthcare provider from whom I might obtain such counseling; (iv) I have received and read the Patient Informed Consent in its entirety and realize I may retain a copy for my records; (v) I consent to the use of the leftover specimen and health information as described in the Patient Informed Consent; (vi) I consent to having this test performed and I will discuss the results and appropriate medical management with my healthcare provider.
 Signature of Patient (Required) _____ Date (Required) _____

5: PATIENT BILLING INFORMATION:

PLEASE INCLUDE A COPY OF THE INSURANCE CARD(S) FOR BILLING PUPPOSES.

<input type="checkbox"/> CLIENT BILL	<input type="checkbox"/> INSURANCE	<input type="checkbox"/> MEDICARE/MEDICAID	<input type="checkbox"/> SELF PAY

8 Enterprise Lane, Oakdale CT-06370
[Tel:\(860\)574-9172](tel:(860)574-9172); Fax: (860)574-9264
Email: info@gdilabs.com

I understand that I am responsible for providing accurate information about my insurance to Genesys Diagnostics Inc. I understand that Genesys Diagnostics Inc. will be providing testing service and billing my insurance. However, I understand that charges that are not covered by my insurance, including any applicable co-payments and deductibles are my responsibility and I agree to pay such charges promptly.

Signature of Patient/Responsible Party **(REQUIRED)** _____ Date **(Required)** _____

Patient Informed Consent

Introduction: This form describes the benefits, risks, and limitations of this screening test. You should seek genetic counseling prior to undergoing this testing. Read this form carefully before making your decision about testing.

Purpose: The purpose of this test is to screen your pregnancy for certain chromosomal abnormalities, such as too many or too few copies (this is called an “aneuploidy”) of chromosome 21, 18, 13 as well as the sex chromosomes (X and Y). It can also test for trisomies (too many copies) of chromosome 9 and 16, as well as microdeletions of certain chromosomes, which are listed on the front of this form. This test is not intended to be performed prior to the 10th week of pregnancy, as estimated by last menstrual period, crown rump length, or other appropriate method (equivalent to 8 weeks fetal age as determined by the date of conception). Your healthcare provider has determined that this test is appropriate for you. Consult your healthcare provider for more information about this test, including the limitations and risks of this test, performance data, and error rates, descriptions of the common aneuploidies and sex chromosome aneuploidies, and what the test results may mean to you.

How this Test Works: This test screens for specific chromosomal abnormalities by looking at the DNA (genetic material) in your blood. To determine whether too few or too many chromosomes are present, this test uses a technology called ‘massively parallel DNA sequencing’ to count the number of copies of the specific chromosomes, and then uses a proprietary method to determine if there are too many or too few copies of the chromosomes in your pregnancy.

Sex of Pregnancy: Depending upon what your healthcare provider orders, the test results may include the sex of the pregnancy. If you do not wish to know the sex, please tell your healthcare provider not to disclose it to you. Depending upon the test ordered you may not be able to prevent learning the sex of your pregnancy. In rare instances, incorrect fetal sex results can occur.

Limitations of the Test: This is a screening test that only looks for specific chromosomal abnormalities. This means other chromosomal abnormalities may be present and could cause health concerns. This test does not test the health of the mother. Normal test results do not eliminate the possibility that your pregnancy may have other chromosomal abnormalities, birth defects, or other conditions, such as open neural tube defects. In addition, a normal result does not guarantee a healthy pregnancy or baby. This test, like many tests, has limitations including, false positive and false negative rates. This means that the chromosomal abnormality being tested for, may be present even though it was not really present (this is called a “false negative”); Or that you may receive a positive result for the chromosomal abnormality being tested for, even though it was not really present (this is called a “false positive”). Further testing of the pregnancy and in some cases you, may be needed to confirm your test results which could result in additional expense to you and additional invasive testing procedures (e.g., amniocentesis or chorionic villus samples). We recommend that no irreversible clinical decisions be made based on these screening results alone. If definitive diagnosis is desired, chorionic villous sampling or amniocentesis would be necessary. Consult your healthcare provider for more information about the limitations of this test, including error rates (false positives and false negatives). Genetic counseling before and after testing is recommended.

Test Procedure. A tube of your blood will be drawn and analyzed

Physical Risks: Side effects of having blood drawn are uncommon, but may include dizziness, fainting, soreness, bleeding, bruising, and, rarely, infection.

Discrimination Risks: Genetic information could be used as a basis of discrimination. To address concerns regarding possible health insurance and employment discrimination, some countries, U.S. states and the U.S. government have enacted laws to prohibit genetic discrimination in those circumstances. The laws may not protect against genetic discrimination in other circumstances, such as when applying for life insurance or long-term disability insurance. Talk to your healthcare provider or genetic counselor if you have concerns about genetic discrimination prior to testing.

Pregnancy Outcome Information: Collecting information on your pregnancy after testing is part of a laboratory’s standard practice for quality purposes, and is required in several states. As such, Genesys or its designee may contact your healthcare provider to obtain this information.

Incidental Findings: In the course of performing the analysis for the indicated tests, information regarding other chromosomal alterations may become evident (called Incidental Findings). Our policy is to NOT REPORT on any Incidental Findings that may be noted in the course of analyzing the test data.

Privacy: We keep test results confidential. Your test results will only be released in connection with the testing service, to your healthcare provider, his or her designee, other healthcare providers involved in your medical care, or to another healthcare provider as directed by you (or a person legally authorized to act on your behalf) in writing, or otherwise as required or authorized by applicable law.

Use of the Information and Leftover Specimens: Pursuant to best practices and clinical laboratory standards leftover de-identified form specimens (unless prohibited by law) as well de-identified genetic and other information learned from your testing may be used by Genesys or others on its behalf for purposes of quality control, laboratory operations, laboratory test development, and laboratory improvement. All such uses will be in compliance with applicable law. Leftover specimens from New York State will be destroyed within 60 days.

Research: We may use your leftover specimen and your health information, including genetic information, in an anonymized or de-identified form (unless otherwise allowed by applicable law) for research purposes. Such uses may result in the development of commercial products and services. You will not receive notice of any specific uses and you will not receive any compensation for these uses. All such uses will be compliance with applicable law. This does not apply to leftover specimens collected from New York State.

Test Results: Your test results will be sent to the healthcare provider that ordered the test. Speak with him/her if you would like a copy of the test results. Your healthcare provider is responsible for interpreting the test results and explaining the meaning to you. Genesys does provide genetic counseling services directly to patients.
